

Dan Meinking's Chess Problem Collection

rev. 9-Sep-2011

{ this free PDF can be downloaded from the [Parry Series & CapZug Hub](#) page at: <http://parryserieshub.chessproblems.ca> }

This collection presents 236 chess problems created (or co-created) by your humble correspondent over the span of roughly 30 years. Only the best of 400+ published works appear here. Problems are arranged in sections, by genre and length. Each contains brief comments.

I've stored my personal collection in the excellent PDB (Problem Database) software for many years. A number of the selected problems cite predecessors listed on the [PDB](#) website. These references are in the form **Pnnnnnnn**, where **nmmmmnn** is the 7-digit PDB problem-ID. Simply click a particular [**Pnnnnnnn**](#) link to see that comparison problem. To see all problems of mine on the PDB website, click [here](#).

For those new to chess problems, I recommend the [StrateGems](#) website, in particular the [Beginner's Corner](#) forum which will help explain much of the [terminology](#) used herein. The majority of my problems are [Helpmates](#). A fair number are of the [Series-Movers](#) and [Stalemates](#) and [Proof Games](#) genres. And a still smaller group are of the [Two Movers](#), [Three Movers](#) and Endgames varieties.

Thanks to [Reb Orrell](#), who built and continues to maintain the StrateGems website, and to David L. Brown who developed the [chess fonts](#) for the site and this document. For those curious, I have [my own page](#) on the site. You'll find an interesting chess game there as well.

Tournament chessplayers and chess composers are familiar with the World Chess Federation, known as [FIDE](#). One of FIDE's member organizations, the World Federation for Chess Composition ([WFCC](#)) -- replacing the former PCCC -- produces a "FIDE Album" of the best problems published in a specified 3-year period. FIDE Album selections are made by a panel of judges, and must meet strict guidelines.

This collection denotes 25 **FIDE Album** items published up to and including the period 2001-2003. Footnote: I did not submit problems for the 1995-1997 FIDE Album due to politics within the PCCC at the time -- a regrettable decision as this was one of my more prolific periods. I also missed the 2004-2006 and 2007-2009 Album deadlines mainly due to my lack of composing during that time.

July 1st, 2011: In April 2009 I discovered a new genre now known as "**Parry Series**", denoted as **pser-*** and **phser-***. And in July 2010, I developed a new stipulation dubbed "**CapZug**" (capture-zugzwang), denoted as **xz**. Indeed, most of my recent composing has been in the Parry Series and "Zug Family" realms. Visit the [Parry Series & CapZug Hub](#) for rules and related developments. Be sure to check out Cornel Pacurar's [online forums](#) as well, which have private threads for Parry Series and CapZug collaborations.

For the record...

1975: my first chess tournament
1977: my first published problem
1984: U.S. Master of Chess
1985: U.S. Expert of Chess Composition
1995: U.S. Master of Chess Composition
1998: co-founder of "**StrateGems**" (**SG**); section-editor through 2003
2007: [FIDE Master](#) of Chess Composition

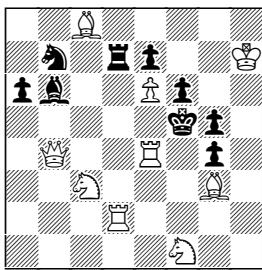

Please contact me (dmeinking /A/T/ roadrunner) if you find any errors, or additional comparison problems. I'll publish updates as needed.

Enjoy!

Dan

This modest offering might be construed as 'controversial' by some -- due to the fact that there are no "reflex-tries". Since tries aren't obligatory for direct- or self-mates, I opine: nor are they for reflex-problems. Also, it's not incumbent upon the author to stipulate pser-semi-r to imply "no tries exist". Indeed, the semi-reflex form was invented to facilitate otherwise **cooked** reflex ideas -- not to be used as a "no-try" declaration.*

Compare this to its help-stalemate predecessor: do a search for the word "Palisades" to locate it.

Zug Family: StalemateZug (=z)

DM / Original 2011

1.d1=B Bb3! (tempo) 2.Bxb3 f6 3.Bg8 f7 4.Kb3 fxg8=B+ (Phoenix) 5.Ka3 Bb3 =z

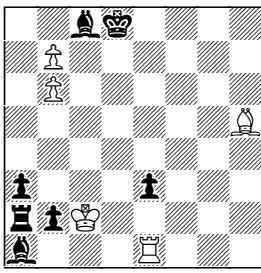

playful interaction by the Bishops, including tempo and Phoenix

The state of **StalemateZug** (denoted as =z) is achieved when the side on-move: (1) has one or more legal stalemating moves; and (2) no legal non-stalemating moves; and (3) is not in check. See the post of **10-Apr-2011** on the [Hub](#) page, which includes the PDF article "**Zug Family Preview**".

DM & Guy Sobrecases / diagrammes 2010 / "to the CZW!"

wQ/bR/bB/wS switchbacks timed perfectly to inch the bK into place; two parry-with-check sequences dedicated to the CapZug Workshop crew; published as "*Dedie a Arno, Bojan, Cornel et Geoff*"

The CapZug Workshop is one of several private composing forums at [Cornel Pacurar's](#) site.

Guy exploits a key-move "zug" exquisitely in this Helpmate treasure: [P1084998](#).
